BLOCKNZORBE™ ACOUSTIC CEILING CLOUDS
HANGING INSTALLATION INSTRUCTIONS

RECEIVING AND HANDLING

Prior to unpacking, check package for any obvious shipping damage. If no evidence of damage is present, move package to a dry/controlled area and inspect it for any lesser-noticeable damage. If damage has been identified, record it/photograph it, and open to inspect for concealed damage.

INSTALLATION TOOLS

- Corkscrew hangers (provided)
- Light duty cable or chains
- Cable clamps
- Level

HOW TO INSTALL

1. Measure out at least 4" in from each corner, and screw in the corkscrew until only the eyelet is visible. Apply light downward pressure as you screw in the corkscrew. Eyelet should be parallel with the edge of the cloud.

2. Repeat step on the other corners of the cloud.

3. Loop suspension cable (provided by other) into the eyelet on the corkscrew and close the loop with a cable clamp or similar hardware.

4. Anchor the suspension cable to the roof deck or ceiling structure. Use level to ensure an even hang.

> **IMPORTANT NOTE!**
>
> For multiple installations, creating a cardboard template with cutout holes can help speed up the overall process.
>
> If the corkscrew is crooked, start with a fresh hole and be sure to match the other edges symmetrically.
